B-tech Computer Science and Engineering *GPA: 8.83*                            Sep 2020 - Current

## INTERSHIP

**Zooked**                                                                                Remote
*Backend Developer*                                                         August 2022 - May 2023

- Developed API for reviews page of website, summary of vendor sold package.
- Enhanced the program by passing vendor Id in jwt token rather than taking input from frontend.
- API to upload file in AWS s3 and download file from AWS s3 .
- JWT Authenication between two microservice.
- Fetch the data from arangodb.

## PROJECTS

**Payment Gateway Backend** *Node.js, Mongodb, Postman*
Facilitated a seamless billing process through a Node.js billing server following REST principles. Users effortlessly create accounts, access comprehensive product details, and manage their shopping carts with ease. The server enables clear billing insights, showcasing prices, quantities, and taxes for accurate order review and confirmation.

**OpenAI SQL generate** *Node.js, OPENAI, React*
This is a full stack app that converts natural language English to SQL queries using OpenAI's GPT-3.5 architecture and text completion API. The app has a client and a server, each with its own npm packages. The front end is built with React, and the back end is built with Node.js and Express.

**PDF Merge Helper** *HTML, Node.js*
A versatile tool for merging PDF files with customizable limits. With the PDF Merge Helper, you can easily combine multiple PDF documents into a single file.
